# App Lab launch day

WED · NOV 11, 2026

Name: _____ Period: _____

Go to code.org/applab. Sign in. Start a new blank project for each mission.

## Today's goal

Build three tiny apps. I can name UI elements with type-first camelCase IDs, identify input and output, connect UI Controls blocks, and test a change.

Open the matching UI build map your teacher shares for each mission.

LOOK → DESIGN → NAME IDs → CONNECT → TEST → SHOW

## 1 Button Beacon

0–30 MIN

| | |
|---|---|
| DESIGN | New app. Rename the screen screenMain. Add labelTitle "Help desk"; buttonAction "Tap for help"; labelMessage "Ready when you are." |
| BLOCKS | In UI Controls, put setText(labelMessage, "Help is on the way") inside onEvent(buttonAction, click). |
| TEST | Before tap: Ready when you are. After tap: Help is on the way. Input = tap; output = changed text. |

☐ Built ☐ Tested twice ☐ Can explain the input and output

## 2 Resettable Status

30–60 MIN

| | |
|---|---|
| DESIGN | New app. Use screenMain, labelTitle "Room status", labelStatus "Not started", buttonStart "Start", buttonReset "Reset". |
| BLOCKS | Make two click events. buttonStart sets labelStatus to "In progress"; buttonReset sets it to "Not started". |
| TEST | Tap Start → Reset → Start. The status should change each time. |

☐ Built ☐ Tested twice ☐ Can explain the input and output

## 3 Name Badge

60–90 MIN

| | |
|---|---|
| DESIGN | New app. Use screenMain, labelTitle "Name badge maker", textInputName with placeholder "Type your name", buttonMake "Make badge", labelBadge "Your badge appears here". |
| BLOCKS | Inside onEvent(buttonMake, click), place setText(labelBadge, getText(textInputName)). Use UI Controls only. |
| TEST | Try Ada, then Kai. The badge must show each name you typed. After passing, style your badge. |

☐ Built ☐ Tested twice ☐ Can explain the input and output

MINOR GRADE · MISSION 3

Show your teacher: type-first IDs, working click → getText → setText, and both name tests.

Ready submission: ○ 1st = 100 ○ 2nd = 95 ○ 3rd = 90 ○ later = minus 5 each

Teacher score: _____ Initials: _____ (Run clicks and help requests do not count.)

HELP LADDER Run → exact ID → click event → correct output label

When stuck, fix one link in the chain. Then test again.
